

APPLE ELITE™ PASTE ELECTROLYTE

For Rapid Replenishment

Net Contents: 60cc

Farnam® Apple Elite™ paste electrolyte provides fast, convenient replacement of electrolytes for horses in need of replenishment from the effects of rigorous activity, competition, sweat, stress, travel, sudden change of temperature or environment.

FEEDING DIRECTIONS: Feed the following amounts of Apple Elite™ paste electrolyte per day. Always provide access to water when using this product. May be used up to 12 hours prior to exercise or travel to help minimize electrolyte loss. Best given in approximately 20cc increments to minimize product being "dropped" from the mouth. May be given every 4-6 hours if needed.

Exercise Intensity	Amount of Apple Elite™ paste per day
Maintenance or light exercise	15-25cc
Light sweating (neck, under saddle)	20-45cc
Moderate sweating (whole body)	30-45cc
Heavy sweating (whole body, dripping)	60cc

INGREDIENT STATEMENT: Salt, Water, Potassium Chloride, Magnesium Chloride, Potassium Citrate, Dextrose, Natural and Artificial Flavors, Calcium Chloride, Sorbitol, Xanthan Gum, Methylparaben (a preservative), Propylparaben (a preservative).

GUARANTEED ANALYSIS:
